Contents Volume 29 (1999)

Research Papers

Analyses of process on the strength decrease in frozen soils under high confining pressures
W. Ma, Z. Wu, L. Zhang and X. Chang 1

Water expulsion during soil freezing described by a mathematical model called M_1
Y. Nakano 9

Albedo models for snow and ice on a freshwater lake
H.E. Henneman and H.G. Stefan 31

On the use of electromagnetic induction sounding to determine winter and spring sea ice thickness in the Antarctic
A.P. Worby, P.W. Griffin, V.I. Lytle and R.A. Massom 49

Measurements of temperature distribution, consolidation and morphology of a first-year sea ice ridge
K.V. Høyland and S. Løset 59

Passive snow removal at the Pegasus Runway, McMurdo, Antarctica
R.M. Lang and G.L. Blaisdell 75

Nonlinear analysis for the coupled problem of temperature and seepage fields in cold regions tunnels
Y.-M. Lai, Z. Wu, Y. Zhu and L. Zhu 89

Modelling floating offshore units moored in broken ice: model description
E.H. Hansen and S. Løset 97

Modelling floating offshore units moored in broken ice: comparing simulations with ice tank tests
E.H. Hansen and S. Løset 107

Ice nucleation in industrial wastewater
W. Gao, D.W. Smith and D.C. Sego 121

Thaw weakening of pavement structures in cold regions
E. Simonsen and U. Isacsson 135

A nuclear magnetic resonance study of Antarctic sea ice brine diffusivity
P.T. Callaghan, R. Dykstra, C.D. Eccles, T.G. Haskell and J.D. Seymour 153

Corrigendum

Corrigendum to: 'A Gibbs thermodynamic potential of sea ice' [Cold Reg. Sci. Technol., 28 (1998) 83–142]
R. Feistel and E. Hagen 173

Research Papers

Creep of polar firn
B. Meussen, O. Mahrenholtz and H. Oerter 177

Comparison of the physical environment of some Arctic seas
S. Løset, K. Shkhinek, O.T. Gudmestad, P. Strass, E. Michalenko, R. Frederking and T. Kärnä 201

Computational modelling of frost heave induced soil–pipeline interaction. I. Modelling of frost heave
A.P.S. Selvadurai, J. Hu and I. Konuk 215

Computational modelling of frost heave induced soil–pipeline interaction. II. Modelling of experiments at the Caen test facility
A.P.S. Selvadurai, J. Hu and I. Konuk 229

Alternative pathways for seawater freezing
G.M. Marion, R.E. Farren and A.J. Komrowski 259
